PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

09/709,772

Applicant(s)

GLADWIN ET AL.

Examiner

Stella L. Woo

Art Unit

2614

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 7 and 8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 7-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 7-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Claim 1, lines 7-9 recite the base station as configured to “convert said digital files to a predetermined format compatible with one or more conventional playback devices.” According to applicant’s disclosure, the base station 200 receives digital audio data 220 and, then, converts this digital audio data 220 to analog format, which is compatible with stereo 105 or FM radio 106 (see Specification, page 5, lines 5-22). Therefore, the “digital data files in said predetermined format” output by the base station is the analog format.

However, claim 1, lines 9-10 recite the base station as “including a receiver for receiving said digital files in said predetermined format.” According to applicant’s disclosure, the base station 200 receives signals in a digital format, not analog format (see digital audio data 220 in Figure 2; page 5, line 10). Therefore, applicant’s

Art Unit: 2614

disclosure fails to support the base station as "including a receiver for receiving said digital files in said predetermined format."

Additionally, claim 1, lines 10-11 recite the base station as "transmitting said digital data files to a remote receiver." However, the base station 200 transmits analog audio (see analog audio 22 in Figure 2; page 5, lines 16-17), not digital data files.

Therefore, applicant's disclosure fails to support the base station as "transmitting said digital data files to a remote receiver."

Should claim 1 be amended to conform to applicant's specification, the following rejections would apply.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Janik (US 2005/0113946 A9) in view of Margulis (US 6,263,503 B1) for the same reasons given in the last Office action and repeated below.

Regarding claims 1, 7, Janik discloses a system (Figure 1) for enabling digital audio data files to be played on a remote conventional audio device (stereo receiver 44), the system comprising:

a host PC (personal computer 34) configured to be connected to the Internet (Internet 8), said host PC configured to store digital data files and receive streaming digital files (PC 34 acquires, stores, and manages digital audio content, including digital audio files and digital audio streams from Internet 8 servers; page 3, para. 47);

a playback system including a base station (digital audio converter 32 is operatively coupled to PC 34 via access point 28) configured to receive said digital files from host PC and convert said digital data files to a predetermined format compatible with one or more conventional playback devices (digital audio converter 32 receives digital audio streams sent from the PC 34, decodes and de-compresses the digital audio in real time, converts it from a digital format into analog electrical signals compatible with a conventional stereo system 40; page 4, para. 50).

Janik differs from claims 1-3 and 7 in that it does not specify a receiver for re-broadcasting said audio files to the stereo system. However, Margulis teaches the desirability of using a repeater (RF repeater 414) to rebroadcast audio, received from a base station, to a conventional playback device so that audio signals can be reproduced in a separate room while maintaining transmission quality (col. 6, lines 38-56). It would have been obvious to an artisan of ordinary skill at the time of invention to incorporate a repeater, as taught by Margulis, within the system of Janik in order to achieve the same benefit, that is, rebroadcast audio signals transmitted by the base station (digital audio converter 32) to a stereo system located in a different room while maintaining transmission quality.

Regarding claims 2-3, in Janik, stereo system 40 includes a conventional stereo receiver 44 (page 3, para. 46), and digital audio converter 32 provides local FM broadcast radio (page 4, para. 58).

Regarding claim 8, Janik shows a remote control device 52, remote from playback device 40 (Figure 1).

Response to Arguments

5. Applicant's arguments filed August 22, 2007 have been fully considered but they are not persuasive.

Applicant again argues that "the Janik reference is not prior art" the pending claims are supported by the parent application U.S. Patent Application No. 09/649,981, which claims the benefit of U.S. Provisional Patent Application No. 60/151,714. Independent claim 1 recites "a playback system including a base station" and "said base station including a receiver for receiving said digital data files in said predetermined format and transmitting said digital data files to a remote receiver." Applicant states that "the PC Adapter 24 as used in the parent application is a base station in the same sense as the term base station is used in the instant application."

However, claim 1 now recites a base station which does not find support in either the present disclosure or the parent application. As described above in the rejection under 35 U.S.C. 112, 1st paragraph, the base station 200 does not receive analog audio data (digital data files in said predetermined format compatible with conventional playback devices). Rather, base station 200 receives digital audio data and converts the digital data into analog format. Additionally, the base station 200 does not transmit

Art Unit: 2614

digital data files. Rather, base station 200 transmits analog audio data. Similarly, in the parent application, PC adapter 24 receives digital audio data from host PC 26 and converts the digital data to analog audio data. Therefore, neither the present disclosure nor the parent application supports a base station which receives analog audio data or transmits digital data files.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

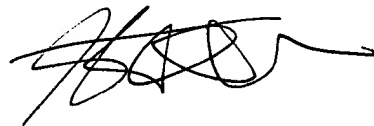

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stella L. Woo whose telephone number is (571) 272-7512. The examiner can normally be reached on Monday-Friday, 8:00 a.m. to 4:30 p.m..

Art Unit: 2614

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
